Centralization v. Decentralization

What is best for Canada—greater centralization of government than already exists or, a larger measure of decentralization of administration? The building of a bureaucracy which might be a good deal of attention in the minds of the people of this country. It is a question which has great many minds and one in which there is room for a great deal of honest difference of opinion, one of the reasons why it is assuming a good deal of prominence.

In this country there are two schools of thought, representing divergent viewpoints and they are represented both in Eastern and Western Canada, with the general trend of thought in the former, as expressed in public policy, inclined to support more centralization than in the latter.

There are those who contend that Canada, with its federal government, its nine provincial governments, its numerous municipalities and numerous minor local authorities with their satellite boards and commissions is very much overgrown for a country with a population of about eleven million to support them and their tax levies. It is thought that if some of these governmental groups were transferred or consolidated in number with their jurisdiction wholly or partly vested in the remaining governmental entities, it would result in better government at less cost. They agree, doubtless with some justification, that the present system of government is not the best and that there is room for improvement in less overlapping, greater efficiency and greater economy and would, therefore, like to relieve the taxpayers of some of the burden of which they now are made aware.

Decentralization Argument

On the other hand, the advocates of centralization, also perhaps not without justification, that greater centralization of authority would result in the building of a bureaucracy which might be a good deal of attention in the minds of the people of this country. It is a question which has great many minds and one in which there is room for a great deal of honest difference of opinion, one of the reasons why it is assuming a good deal of prominence.

An Interesting Test

Shows Men Tread True Love Defeating
Sneaker Thru World

One person in seven has defective hearing, a preliminary analysis of the hearing of a representative of a national individual tests by the Bell Telephone Company of Canada revealed.

Hearing becomes less acute with age and men tend to become hard of hearing more than women. The tests also show:

The higher tones are lost first, then the lower tones and lastly the middle tones. One person in twenty-five has a hearing loss of more than 100 per cent in 125 ordinary conversational tones.

The tests also show that there is no difference between tests taken in the morning and those taken at night. It is surprising at this fact, because it indicates fatigue does not dull hearing.

Already more than 500,000 have taken the tests in New York and more than 300,000 in San Francisco.

During the test, a person listens with a telephone receiver to amplified adjusted tones of various pitches that grow fainter until the point is reached where the listener can no longer hear them.

Each listener makes a record of the tones heard and the number of a specially prepared form. An alphabetical list of the results is compiled from that indicates age group and sex and race and is through a machine that produces an audiogram.

Australia Tells Steps To Save Koala Bears From Extinction

The following article by Helen Jones appeared in the Empire Review.

Alarm at the rate at which koalas were being wiped out by the bush fires led to the formation of the Koala Club in 1937. This in turn led to the first appreciation of the work done at Koala Park, West. Penzance Hills, near South Wales, a sanctuary where native koalas can live safely in natural surroundings.

At a strength of about 100,000, koalas have little enemies, with their rubber-like nose, soft-furred fur, and their habit of clinging to the tree trunks into their puzzling diet.

The question of diet has given the founders of the Park much trouble, for although it was known that koalas lived on gum leaves, it was not fully realized that out of the 600 different types of Australian eucalyptus, only a score of them are eaten by koalas and that individual koalas are limited to one or two varieties. Thus the Queensland koala, for example, is limited to weighing about six pounds, demanded special gum leaves containing the right kind of oil.

The koalas of the Victorian koalas, with the heavy eucalyptus leaves, can weigh up to 20 pounds, live almost exclusively on the leaves of the gum tree, which contain the right kind of oil.

The intermediate koala of New South Wales leaves from the blue gum, grey gum and red gum trees, and also a eucalyptus.

The climate of the koala bear has two brains. The normal arrangement in the human and animal world is that the brain is in the head, but in the koala it is in the chest, and the brain is in the head, but in the koala it is in the chest.

are commonplace reflections, but are of little value to the majority of producers.

No one can object to wheat prices going upward to a level at which the producer makes a fair profit in line with the prices at which he is compelled to buy, but the recording of profits taking on grain elevators is a significant indication of the trend in some quarters, and no doubt the government eventually will take over the control of wheat as it did in 1918-19.

That which needs to be strongly impressed upon the minds of those in authority, however, is the fact that wheat production is no more for sacrifice to be exacted from the common people while at the same time allowing a privileged class to grow rich in exploiting them. The mistakes of 1918-19 must not be repeated; their results are still around and about us.

NATIONALITY IN WARTIME

Quite recently a well known Canadian store has thought, even foolishly in its view of its advantage, a table indicating the nationality, in addition to the names of the customers, in the store of the day, if it is staff of employees.

That which is noticeable in this announcement is the fact that the list includes not one employee of German origin.

There may, or may not, be some significance in the appearance of such an advertisement at this particular time, but it is well to recall that in Canada, as in the United States, there is a large increasing of persons of Germanic origin among our populations. That the majority of these people have a little sympathy with Hitlerism is not in question generally, is not open to doubt. They have lived, worked and traded among us now for many years, and are not to be considered as such.

Unfortunately, there are those—intention or not—who, when some patriotic outburst arises their discretion. To deal with such, stern measures will doubtless be employed, but it is to be hoped that the incident of British would exhibit a narrow-mindedness of which we, in the western country, should be ashamed.

Let us remember a sense of proportion, remembering the statement of the British government that the Germans are not at war with the German people, but that they are determined to smash Hitlerism once and for all.

Local and District

C.N.R. train fare to Calgary and return, Sept. 19, 20. See ad.

Mrs. W. A. Rollin is a patient in Drumheller hospital.

Arthur Roloff, of Calgary, was a visitor in Delia on Monday of last week.

Mr. and Mrs. E. M. Hignow were visiting in Calgary over the holiday week end.

Perry Gates and Jim Puller were away in Calgary on Sunday, September 10.

Barr, in Hanna hospital, on September 26, to Mr. and Mrs. T. McCall, a son.

V. J. McNair shipped the first load of new wheat this week to the T.G.O. elevator, on September 6.

The C.N.R. depot received its first load of white clover last week, and the work crew have moved up the line to Bowler.

Miss Nancy Chen left on Monday last week for Calgary, where she will study during the coming term at Western Canada College.

George Carson, son of Mr. and Mrs. Art Carson of Hays, left on Monday, Sept. 4, for his second year in Vancouver Technical School.

Mr. and Mrs. F. M. Thompson left last week to take up residence in Calgary. Mr. Thompson has obtained a position in that city.

John Lalonde, who has retired following the sale of his farm, left on Wednesday of last week on a visit to relatives in North Dakota.

Miss Alice Nelson, who spent part of the vacation with her parents, Mr. and Mrs. J. F. Nelson, left for home on Monday of last week for a visit to Red Deer school.

E. A. Thompson has returned home from the United States, where he has been in the McClure Sailors' Club at Seattle, Washington, for the last few weeks.

A series of heavy showers on Friday of last week resulted in a large increase in the water level in the river, following a clear sky over night, however, showed little trace of change in the level of the river.

On Sunday morning the sky clouded over and a fine rain started to fall, continuing to drizzle on Monday, heavy rain falling again the night of Tuesday.

Wheat from combine has been pouring steadily into elevators, for the last few days, and the total to date is 75,000 bushels. Up to the present no wheat has been graded below No. 2. Color is good, and there are not many kernels as in some of the past.

The average weight of the bushels, according to the latest report, is 48 lbs. to the bushel, although some have gone to 50 lbs. It is expected that much wheat remains to be cut in the hands of the farmers, although S. A. Paterson is stated to have threshed a small quantity in this district.

FARRELL LAKE NEWS

The Farrell Lake and Maple Lake, west of the house of Mr. T. H. Hensley for the September meeting.

The meeting was opened by the secretary, reading the minutes of the last meeting and the correspondence. Mrs. McKay gave a paper on House and Economics. The roll call was "Do's and Don'ts for Canine." After the meeting was adjourned, a dance lunch was served by the regulars.

Ed Trickle, well-known old-timer, died in the Big Valley hospital on Wednesday, September 6th.

Mrs. Martin Meade and Mr. Ed Meade were visitors in Drumheller last Thursday.

John Lalonde has sold out, stock and barrel, to Art Carson, and is planning on taking his long haul for trip to the United States and Eastern Canada, to visit friends and relatives.

Mr. and Mrs. Beverly Swendall have moved to home in Delia, and have moved the family to her better school facilities during the winter.

Ernie and Charlotte have taken over the house place.

NO PERMITS REQUIRED

The latest ruling of the Wheat Board is that wheat producers will not require permits in order to make deliveries to the Wheat Board. All that farmers will be required to do will be to deliver their wheat to the Board in the same manner as was done last year, being, of course, restricted to a 5,000 bushel limit.

Card of Thanks

Mr. and Mrs. JAMES HENNING wish to thank sincerely their friends for their kind gift to Mrs. Henning while a patient in Hanna Hospital.

PROSPEROUS FARM COMMUNITY IS AIM OF LINE ELEVATORS

Identity of Interest Exists Between Farm and Elevator

The interest of the Line Elevator Company in the farmer goes much beyond the simple fact of his being a North-West grain dealer's Association, some years ago, organized a Public Bureau for the benefit of the farmer, and promoting the interests of the farmer.

Most important work has been undertaken by Line Elevators. This includes the construction of the Wheat Board and the 50,000 bushel elevator, a survey of research into industrial utilization of farm products in the U.S.A., and the construction of a wheat elevator, and the construction of a wheat elevator, and the construction of a wheat elevator.

It is a valuable work on behalf of the farmer, and the Line Elevator Company are to be commended for the part that they are playing in seeking to make the farmer a better partner in the wheat business.
